

UNIVERSITÀ DEGLI STUDI
DI TORINO

Dipartimento di Scienze Economico-Sociali e Matematico-Statistiche

Laurea Magistrale in ECONOMICS

Two-Year Master Course

Consulting firms, regulatory bodies, large manufacturing and financial firms rely on both strategic thinking and sound measurement of business trends. This Two-Year Master Course combines training in economics and in advanced quantitative techniques. The study of economic systems and economic policy, the interpretation and forecasting of macroeconomic data, and the analysis of market structures are among the core topics of the program. Graduates will hold a diploma of Laurea Magistrale.

First Year

- Microeconomic Analysis
- Macroeconomic Analysis
- Quantitative Methods for Economics
- Capital Markets and Corporate Finance
- Econometrics II
- One course to be chosen between:
 - Numerical Methods in Economics
 - Methodology and History of Economics
 - Behavioral and Experimental Economics

Second Year

- Corporate Law for Economics
- Four courses to be chosen between:
 - Monetary Economics II
 - Labour Economics II
 - Economic Applications of Game Theory
 - Industrial Economics II
 - Topics in International Economics
 - Political Economics
 - Public Economics and Finance
 - Economics of Savings and Pensions
 - Growth and Development
- Electives
- Final Dissertation

Students have considerable freedom in shaping their second year according to professional objectives and cultural motives.

Placement

Students who graduate in Economics possess an in-depth knowledge of economic methods and problem-solving skills, allowing them to obtain qualified positions in international organizations and regulatory bodies. Also, high-profile jobs at consulting companies, industrial firms and banks are easily accessed.

Some of the most important companies where our graduates were employed are, among others: Bain &C Consulting, British Petroleum, Belgrave Capital Management, Deutsche Bank, Ferrero, Fondaco s.g.r. Torino, IntesaSanpaolo, Nomura Londra, Unicredit Group.

Moreover, the program also provides students with the background to enter top international PhD programs, and ultimately to work as research economist within Universities and other research centres. Some of our graduates have been admitted to top international Ph.D. programmes, among the others: Harvard University, London Business School, London School of Economics, New York University, Northwestern University, Stanford University, University of Chicago, University of Pennsylvania, Yale.

International Exchanges

Students international mobility is possible through the Erasmus/Erasmus+ Programme or by means of ad-hoc international cooperation agreements (e.g. the Double Degree Programmes).

In particular, the following EU partner universities have masters degrees, taught in English, that are close to ours (check availability for your Academic Year.). Erasmus exchanges with such universities are encouraged: *Freie Universitaet Berlin, Carlos III Madrid, Copenhagen Business School, University of Freiburg, Katholieke Universiteit Leuven, Ludwig-Maximilian Munchen, Monash University Melbourne, Sydney University, University of Helsinki, Universidad Autonoma de Barcelona, Universidad Autonoma de Madrid.*

Interaction with Collegio Carlo Alberto

Collegio Carlo Alberto is a foundation fostering research and teaching in economics, sharing the best practices of the international academic community. Students are encouraged to join weekly seminars as well as the “Collegio aperto”, which is a lecture series on current economic topics. Academically outstanding students may apply to become Senior Allievi of Collegio (www.carloalberto.org) who are expected to fulfil their university requirements, as well as to participate in additional activities at Collegio.

Admission requirements and Application procedures

Applicants are expected to satisfy the following requirements:

- An undergraduate degree with a grade equal to or exceeding 90% of the highest grade (**99/110** for an Italian degree). Students can also apply if they are not yet graduated.
- Good command of the English language (at least level **B2** of Common European Standards).
- **One tenth of total undergraduate credits in Economics, and one tenth of total credits in Math and Statistics.** Undergraduate degrees in Economics and Management coded L-18 (ex L-17) and L-33 (ex L-28) satisfy this.

Applicants may otherwise be considered for an interview.

The interview will be held in English (during which the candidate must prove to be able to write, speak fluently and read in English), and will deal, depending on the candidate's weakness, with fundamentals of Microeconomics, Macroeconomics, Math and Statistics.

The online application procedure is mandatory.
